

Motto: Automotive industry belongs to the fastest developing industries where applied science spans an incredible range from Nanotechnologies over Robotics to Cloud, IoT, or Artificial Intelligence. It is the main accelerator of evolving trends like Industry 4.0, Dense Energy Accumulation, or Self-driving vehicles. Academia must respond to those challenges by providing corresponding advanced study subjects and branches and bringing the industrial experts closer to the education process, keeping it more international and multidisciplinary at the same time.

To promote new ideas and cooperation between Automotive Industry and Academia, we cordially invite you to

one-day Workshop on

## Academia & Automotive Industry: Needs, Trends and Future Developments

Date: Monday, June 26th, 2017

Venue: FEE CTU, Technická 2, 16627 Prague 6, Room T2:A4-7 (ground floor)
