

Applications Engineer Engineering Leadership Program

National Instruments Eastern Europe Region

To apply, please visit the **Career Portal of National Instruments Eastern Europe** at <https://www.nieecareer.com>

The National Instruments Applications Engineer Engineering Leadership Program (ELP) is designed for fresh engineering university graduates with strong leadership qualities who are interested in developing their careers in the area of engineering, technical field sales and consulting. The Applications Engineer position is a leadership training position at NI where young engineers learn hands-on about the company, technology, and customers. New ELP engineers benefit from extensive training on National Instruments products and related technologies, our business strategies and systems, public speaking, and our customers and markets we and they serve. National Instruments is looking for dynamic, enterprising, and responsible people for a long-term career who will continuously drive the company's success.

While in the ELP you will:

- Work for two to three years to learn our products, customer needs, and markets. During this time, you interface between NI and our customers to find creative and timely solutions to customers' technical applications.
- Work extensively with many departments in the company, including R&D, Sales, Marketing, and Manufacturing. Because of the broad exposure to the company during the ELP training period, you gain valuable skills.
- Participate in training designed to prepare you for a career at National Instruments.
- Work on challenging, innovative projects such as developing a proof-of-concept LabVIEW program to present technical feasibility of our systems in real-life applications.
- Develop technical demonstration systems and materials.
- Conduct customer training courses, present technical seminars, and attend tradeshows.
- Work in a multinational engineering team.

Requirements:

- A thorough understanding of electronics, computers, and high-level programming languages (C, C++, etc.)
- Bachelor degree with major in Electrical Engineering, Computer Engineering, Automation, Mechatronics, Robotics, Telecommunications, Biomedical or Physics
- Fluency in English and in one Eastern-European language (written, oral and reading)
- Excellent oral and written communication skills
- Ability to acquire new knowledge and skills, and to effectively apply them
- Ability to take initiative, ownership, and drive tasks to completion
- Interest in becoming a technology expert on instrumentation-related hardware and software

National Instruments Offers:

- Attractive overall compensation package
- Integration into a motivated, high energy, fun, and technical work team
- Technical, challenging, and varied work with customers and NI teams
- Various professional career development opportunities
- Continuous technical and professional development with a career path in field technical sales consulting

About National Instruments

Since 1976, National Instruments (www.ni.com) has equipped engineers and scientists with tools that accelerate productivity, innovation and discovery. NI's graphical system design approach to engineering provides an integrated software and hardware platform that speeds the development of any system needing measurement and control. Engineers and scientists use this platform from design to production in multiple industries, advanced research, and academia. NI ensures customer success with an ecosystem of services, support and more than 700 Alliance Partners worldwide. The company's long-term vision and focus on improving society through its technology has led to strong, consistent company growth and success of its customers, employees, suppliers, and shareholders.

With graphical programming software and modular, open hardware, NI has redefined how engineers work throughout the entire product design cycle, resulting in reduced time to marketing and lower development costs. Headquartered in Austin, Texas, NI has over 7 100 employees with direct operations in over 50 countries. The company sells products to more than 35,000 companies in 90 countries.
